Drawings

Figures 8 and 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because of the minor informality. On line 6, “[respective]” should be deleted. Correction is required. See MPEP § 608.01(b).

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

Claims 13-15, 23 are objected to because of the following informalities:

In claims 13 and 15, “first MOS transistor” should be changed to --third MOS transistor-- and “second MOS transistor” should be changed to --fourth MOS transistor-- to avoid confusion.

In claims 14 and 15, “the MOS transistor” should be changed --the first MOS transistor-- to have proper antecedent basis.

In claim 23, line 5, “a first” should be changed to --a third-- to avoid confusion.

Appropriate correction is required.

Claim 12 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 10.

When two claims in an application are duplicates or else are so close in content that they both

Art Unit: 2819

cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-27 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Teraoka et al. (US 6,097,113).

Teraoka et al. shows and teaches all the elements and means of the claimed invention of the claims 1-27. See figure 1, 10 and 11.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
